

A P A C T

AND MY PROMISE TO YOU

“There are so many factors that affect drug dosages, drug allergies and potentially dangerous drug interactions. We’re always working on the next generation of technology to help you get the medicines that are right for you.”

*Tom Bailey, MD
Director of Medical Informatics
BJC HealthCare and
Washington University School of Medicine*

At BJC HealthCare, people like Dr. Tom Bailey have committed their careers to providing safe, quality health care to our patients every day. ☺ Using computer technology, Tom and his team at Washington University have developed customized ‘pharmacy expert systems’ to alert our doctors and pharmacists to potential medication issues. ☺ These special programs have been recognized by the Smithsonian Institution as breakthroughs in health-care quality. ☺ But we haven’t stopped there. Tom and his colleagues continually develop new automated tools to help protect the health of you and your family. ☺

For a free brochure about partnering for quality health care, call 314-362-WELL.
