

A P A C T

AND MY PROMISE TO YOU

“Our emergency department’s new computer system is easier for me and better for my patients. By printing any prescription I’ve ordered on demand, I can confidently know that a clearly readable prescription will result in the right medication, in the correct dose, for my patient.”

Rosy Herath, MD

Barnes-Jewish St. Peters Hospital

Emergency department physician

The last time you got a prescription from your doctor...could you read it? ☺ Have you ever wondered how your pharmacist does? ☺ At Barnes-Jewish St. Peters Hospital, physicians like Dr. Rosy Herath are using a new computer system in our emergency room that helps everyone see things much more clearly. ☺ Our Emergency Department’s new computerized patient documentation system is the only one of its kind in St. Charles County. ☺ Instead of being hand-written, our physicians’ prescriptions are printed directly from the computer as they’re entered. ☺ This ensures that you receive the medicine you were prescribed, with no interpretation necessary. ☺ It’s one more tool that helps Barnes-Jewish St. Peters Hospital’s skilled nurses and physicians deliver the safe, compassionate care you expect. ☺
