

A P A C T

AND MY PROMISE TO YOU

“When I receive an order from a physician, I check it for seven critical pieces of information.

This helps us deliver the images your doctor needs as soon as possible.”

Renee Freund, RN

*Barnes-Jewish West County Hospital
Imaging Center*

At the Barnes-Jewish West County Hospital Imaging Center, our job is to gather X-ray and other images that will help your doctor provide the care you need. ☺ But before we begin any procedure, we make sure we have everything we need to keep you safe. ☺ Each order we receive from your physician is reviewed for seven critical pieces of information. ☺ If even one bit of this information is missing or incomplete, we contact your physician's office to make sure we have everything we need to safely perform the exam your doctor ordered. ☺ Because we take the time to gather this critical information, physicians get the images they want to make a diagnosis and deliver appropriate care. ☺ And you can get through your exam safely and on with life. ☺
