

A P A C T

AND MY PROMISE TO YOU

“When a heart attack occurs, we’re ready to treat it quickly with medications that open up blocked arteries. Giving clot-busting drugs to certain patients soon after arrival is a proven standard of care that saves lives. And, after all, that’s why we’re here.”

*Angie Colley, RN
Alton Memorial Emergency Dept.*

At Alton Memorial Hospital,

we know how important it is to provide our patients with high quality care. ☺

That is why we strive to adopt the best practices in medicine — techniques and treatments that have been scientifically proven to produce the best results for patients. ☺ That is especially important in our emergency department, where doctors and nurses — like registered nurse Angie Colley — must act quickly to save lives. ☺ Whether treating a heart attack or asthma attack, our health-care team works to deliver high quality care. ☺
